¹Some figures appear as 0% due to no dumping and/or subsidy

²Pursuant to section 2(1) of the Special Import Measures Act (SIMA), an amount of subsidy of less than 1% of the export price of the goods is insignificant

Note: The margins of dumping reported in the table above are the margins determined by the Canada Border Services Agency (CBSA) for purposes of the final determination of dumping. These margins do not reflect the anti-dumping duty to be levied on future importations of dumped goods. In the event of an injury finding by the Canadian International Trade Tribunal, normal values have been provided to the exporters which provided sufficient information for future shipments to Canada and these normal values would come into effect the day after the injury finding. Information regarding normal values of the subject goods should be obtained from the exporter. Imports of subject goods from exporters/producers that did not provide sufficient information to the CBSA during the dumping investigation and who are not listed in the table above will be subject to the All Other Exporters anti-dumping duty rate pursuant to a ministerial specification.

As reported in the table above, the amounts of subsidy (as a percentage of export price) are the amounts determined by the CBSA for purposes of the final determination of subsidizing. These amounts do not reflect the countervailing duty to be levied on future importations of subsidized goods originating in or exported from China, which will be based on the specific amounts of subsidy, per piece, converted into Canadian dollars.
